

A workday of a hairdresser

A skilled specialist always provides skilled work. That was the general idea of the theatrical performance staged by the students of Hairdressers department.

The luxury of a hair salon doesn't matter for the customer, if a hairdresser cannot provide a proper service. In the final scene the alumna of the Center (main character of the performance) served the customer successfully and pleased him. The performance was entirely in French and ended in a nice dance with French guests of the Center.

Overcoats, accessories...

The students from Tailors department made an open lesson entitled "Overcoats, Accessories..." It was educational not only for tailors, but also for other students and teachers of the Center. The task was to teach how to accessorize overcoats with scarves, hats and jewelry. The lesson had an objective to improve students' taste.

Gerard Reydellet, a specialist in the relevant field and a partner of the Center, who arrived in Armenia on that day, was invited to that lesson and appreciated the students' work.

World AIDS Day

December 1 is World AIDS Day. HIV/AIDS has become a challenge for humanity. The best way to fight against it is to be informed.

The teacher of Biology E. Hambarzumyan organized informative presentation and demonstrated videos on HIV/AIDS, its threats, the ways it is transmitted, the means to fight against it.

The same topic was the main issue of the discussion arranged by two representatives of "Women's Empowerment Center" NGO. Its specialists together with CEPFA teaching staff and students discussed the causes, symptoms and treatment of HIV/AIDS. The students were very inquiring and asked many questions. The answers of the specialists were comprehensive.

Methods of face imprinting

Dental Technology department prepared a lesson on methods of face imprinting. The students used different materials and made models themselves.

The practical work was illustrated by videos. The teacher of Orthodontics S.Aydinyan gave detailed explanation to the process phases during demonstration of the videos.

Social websites

Social websites have a great impact on teens and this impact grows daily. To be well-informed on the subject means to be up-to-date.

The teacher of Computer Science L.Yavroyan arranged a contest named "Social Websites". Students from different departments competed on a team basis.

Judges of the contest were selected from the teaching staff. They scored the answers to various questions: How do we use social websites? Which social websites are the most popular? What are age requirements for any social website?

Curator's lesson

Besides educational (school and professional) growth every student evolves as a person. The bulk of this upbringing and didactic work is performed by curators.

By the end of the semester the curators' weekly lessons have transformed into didactic and cognitive presentations. For instance, three groups from different departments – Cooks, Tailors and Dental Technicians – thanks to their curators' cooperation performed an interactive lesson.

The topic was the New Year. The New Year miracle, gifts, existence of Santa Clause and Snow Girl, the first frustration related to this holiday – these discussions were as important as information delivered during the lesson.

Cordial reception

Respect towards the grownups and the aged, continuous respect guarantees the progress of any society.

By the end of 2017 the Center received socially vulnerable group of the aged from Yerevan. They enjoyed dinner and songs, dances, poems – an entertainment program was prepared by the students of the Center. Good wishes of those old people sounded like blessing for the students.

Later the old and the young started dancing together, and the atmosphere of parenthood and family care was everywhere.

God bless the old and give them health and longevity...

One day with kids

Charity fills people's hearts and reminds them: one will live in happiness if he or she is ready to help those in need. The teachers and the students of CEPFA visited "Zatik" Yerevan Child Assistance Center. "Zatik" is the home for socially vulnerable children who need everyday care. The participation of the teachers and students from CEPFA, the way they brought gifts, sorted them by age groups, packed carefully and waited impatiently for the day were very touching.

The teachers and the students together with kids from "Zatik" played games, danced, enjoyed a clown show. The students surprised the kids and painted their faces with face art images, styled their hair by French braids. Everything was very emotional and nice... The event must have had deep impression on the students, we hope they will recall it and think it over and over again...

Christmas eve

The end of this year was coloured with one more day of joy and happiness for the students. It was a festive celebration of the Christmas Eve full of various dances, games, jokes. The presence of Santa Clause and Snow Girl, happy wishes proved the most important commandment of life: love your neighbour...

Love and respect can unite everybody and bring to harmonious life. Let's believe that this great love is in the heart of every student and every teacher of the Center.

Happy New Year!
